The United States Coast Guard Navigation Information Service (NIS)

The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS, DGPS, and LORAN-C. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). NANU notices can be obtained via email subscription through the USCG Navigation Center website: http://www.navcen.uscg.gov/gps/status/default.htm. In addition, the NIS investigates all reports of degradation or loss of GPS, DGPS or LORAN service. Mariners are encouraged to report all degradation or loss of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900, Email: webmaster@smtp.navcen.uscg.mil, or on the World Wide Web at: http://www.navcen.uscg.gov

CHARLESTON MIDSTREAM TRANSFER FACILITY (BERTH 1) AND CHARLESTON MIDSTREAM TRANSFER FACILITY (BERTH 2), CHARLESTON, SOUTH CAROLINA, MOORING PROCEDURES AND REQUIREMENTS

The terminal requires all mooring lines to be of the following strengths and configuration.

- (1.) All vessels mooring at Charleston Midstream Transfer Facility (berth 1) or CMTF II (berth 2) on the Cooper River in Charleston SC are required by the terminal to supply a minimum of 24 lines with 50 ton breaking strength for tying up at the facility. No lines with less than 50 ton breaking strength are allowed to be used at the facility. If lines of 50 to 80 tons breaking strength are used then a minimum of 3 lines must be deployed to each mooring buoy. (8 buoys at each berth so a total of 24 lines).
- (2.) Vessels using lines with a minimum breaking strength of 80 tons or greater will be required to use a minimum 16 mooring lines (2 to each buoy at the berth for a total of 16 lines). In this configuration ALL lines deployed must have a minimum breaking strength of no less than 80 tons. If

CHARLESTON MIDSTREAM TRANSFER FACILITY (BERTH 1) AND CHARLESTON MIDSTREAM TRANSFER FACILITY (BERTH 2), CHARLESTON, SOUTH CAROLINA, MOORING PROCEDURES AND REQUIREMENTS

any one of the lines being used in this 16 line configuration has a minimum breaking strength of less than 80 tons then it is compulsory to go to the 24 line (3 lines to each mooring buoy) configuration.

The regular tending of lines is of the utmost importance while moored at Charleston Midstream Transfer Facility and CMTF II. All lines must be kept taught and monitored on a regular basis. All mooring gear including but not limited to winches, winch breaks, lines, eyes, stoppers and the like must be in proper working order prior to arrival at Charleston Midstream Transfer Facility and CMTF II. It is up to the master of each vessel to ensure his vessels safety, the safety of the facility and the surrounding environment while the vessel is moored at Charleston Midstream Transfer Facility or CMTF II as he is the master of the vessel and knows it capabilities and characteristics best. All mariners are expected to conduct all vessel operations in a proper seaman-like manor and exhibit good and proper seamanship at all times and in all tasks. In the event of pending severe or heavy weather the Master of the vessel is required to take all appropriate actions to ensure the safety of his vessel, the mooring facility and the surrounding area. These include but are not limited to adding additional mooring lines, having a 24 hr line watch, regular tending of lines, calling out assist tugs for the account of the vessel to hold the vessel while severe weather is pending or passing through the area, having a 24 hr weather watch, vacating the berth and any other measures that prudent seamanship and safety measures demand for the safety of the vessel, the mooring facility, its equipment, the surrounding area and the environment.

NOAA'S CORAL REEF CONSERVATION PROGRAM EVALUATION

To evaluate and improve the success of its efforts to understand and conserve coral reefs, NOAA's Coral Reef Conservation Program http://www.coralreef.noaa.gov/) is undertaking a comprehensive external review of the program. The purpose of the review is to:

*Evaluate the success of the CRCP in meeting the purpose of the Coral Reef Conservation Act of 2000 (Section 202) and the National Coral Reef Action Strategy during the period 2002-2006

*Provide recommendations that the CRCP may use to improve the program $\,$

The review will take place in September 2007 and will be conducted by a seven-member Blue Ribbon Panel of experts in natural resource science and management.

For complete text of the Federal Register Notice, see the enclosure section Number 7.

INSTALLATION OF LED LANTERNS ON AIDS TO NAVIGATION: SEVENTH COAST GUARD DISTRICT

The U. S. Coast Guard will be installing state of art LED lanterns on aids to navigation through out the Seventh Coast Guard District. The only change to published characteristics will be an increase or decrease in nominal range. As a rule, the change will be an increase in nominal range. On those occasions were a decrease in nominal range may occur, and this reduction in service to the mariner is greater than one nautical mile. The Coast Guard will publish a proposed change and/or an advance notice in this publication. Mariners are requested to review the District Local Notice to Marine closely for changes in their area.

Hurricane Season

The hurricane season extends from June through November. Hurricanes can cause excessive damage to vessels and loss of life. To minimize these dangers, the following precautions should be taken by all mariners before getting underway during the hurricane season:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures;
- (b) Pre-sailing check of vessel, machinery, and equipment for seaworthiness;
- (c) Installation of strong ground tackle;
- (d) Review of storm center evasion procedures;
- (e) Knowledge of nearest hurricane shelter or port; and
- (f) Constant radio watches on channel 16 VHF-FM and frequent monitoring of weather broadcasts.

Hurricane Season

HURRICANE INFORMATION

The civilian hurricane warning service for the North Atlantic is provided by the National Hurricane Center, Miami, Florida. The center collates ship, aircraft, radar, and satellite data to produce and issue tropical cyclone warnings and forecasts for the North Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico. A Tropical Cyclone Advisory message is issued every six hours, with intermediate bulletins provided as needed.

For tropical storms and hurricanes threatening to cross the coast of the U.S., coastal warnings are issued to the public so that precautionary actions, including evacuation, can be initiated to minimize damage and loss of life. Two levels of warnings are employed:

- (a) HURRICANE WATCH a preliminary alert that a hurricane MAY threaten a specified portion of the coast. It is issued 36 hours before landfall may occur; and
- (b) HURRICANE WARNING which indicate that hurricane conditions are EXPECTED along a specified portion of the coast. It is issued 24 hours before landfall. To provide additional information for maritime interests, a Marine Advisory is also issued which provides storm position forecasts for up to 72 hours in advance of a storm, and probabilities of hurricane strikes for coastal locations and offshore coordinates.

Mariners are reminded that aids to navigation, particularly lighted and unlighted buoys, may be moved from charted position, damaged, destroyed, extinguished or otherwise deemed discrepant as a result of hurricane and storms. Mariners should not rely solely upon the position or operation of an aid to navigation, but also employ such other methods of determining position as may be available.

Mariners are further reminded that during the hurricane season drawbridges along the coast may deviate from normal operating procedures. Drawbridges are authorized to remain closed upon approach of gale force winds of 34 knots or greater. Others may be authorized to extend closed periods prior to gale force winds to facilitate evacuation of land traffic or close operations up to 8 hours before expected arrival of gale force winds. Due to the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of gale force winds.

GPS INTERFERENCE TESTING FOR CAPE CANAVERAL

The GPS Navigational Signal may be unreliable from 25 May 2007 through 31 December 2007, due to interference testing on GPS Frequencies used in shipboard navigation and handheld systems. GPS systems that rely on GPS, such as E-911, AIS and DSC, may be affected within a 3NM radius of position 28-28-14N 080-34-48W. During this period GPS users are encouraged to report any GPS service outages that they may experience during this testing via the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN's web-site's GPS report a problem worksheet at www.navcen.uscq.gov

LNM: 24/07

SPECIAL WARNING NUMBER 123, SOMALI.

Due to continuing conditions of armed conflict and lawlessness in Somalia and waters off its coast. Mariners are advised to avoid the Port of Mogadishu and to remain at least 200 nautical miles distant from the Somali Coast.

For Complete Text of Message see Enclosure (1).

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States.

For Complete Text of Message See Enclosure (2).

NAVAL PROTECTION ZONES

The U. S. Coast Guard has established protection zones around U. S. Naval vessels within U. S. navigable waters. Naval vessels protection zones are established within 100 yards of any U. S. Naval vessel. This includes any vessel owned, operated, chartered, or leased by the U. S. Navy or under the operational control of the U. S. Navy.

NAVAL PROTECTION ZONES

Vessels within 500 yards of a U.S. Naval vessel shall operating at the minimum speednecessary to maintain a safe course course and proceed as directed by the official patrol. Mariners may contact the U.S. Coast Guard on VHF Channel 16 regarding this message.

DATES OF LASTEST EDITIONS, NAUTICALS CHARTS AND MISCELLANEOUS MAPS

The Dates of Latest Editions, Nautical Charts and Miscellaneous Maps, dated April 1, 2007, published by the National Ocean Service, is available for issue. It may be obtained free by mail from the FAA/National Aeronautical Charting Office, Distribution Division AVN-530, 10201, Good Luck Road, Glenn Dale, MD, 20769-9700, by telephone at 1-800-638-8972 or from your local authorized nautical chart sales agent. This is a quarterly publication listing the most recent editions of nautical charts, miscellaneous maps and publications relating to navigation, weather, etc. with brief descriptions and up-to-date prices for most of the publications listed. Much of this information may also be obtained online at: http://chartmaker.ncd.noaa.gov/mcd/dole.htm

INTERNET DELIVERY OF U.S. NOTICE TO MARINERS

The National Geospatial-Intelligence Agency (NGA) has changed the way the U.S. Notice to Mariners are made available to the maritime community. NGA will continue to provide U.S. Notice to Mariners to the public but only in the digital version exclusively via the Internet.

U.S. COAST PILOT 4, ATLANTIC COAST: CAPE HENRY, VA TO KEY WEST, FL

PUBLICATION - National Ocean Service - U.S. Coast Pilot 4, Atlantic Coast: Cape Henry, VA to Key West, FL, 2006, 38th Edition, is ready for issue and may be obtained from:

Federal Aviation Administration National Aeronautical Charting Office Distribution Division, AVN - 530 10201 Good Luck Road Glenn Dale, MD 20769-9700

and authorized agents of the National Ocean Service. Price \$26.00. The 2006 Edition cancels the preceding 2005 Edition. All corrections to the previous edition issued in Notices to Mariners are incorporated in this edition.

Mariners are encouraged to use the convenient -RECORD Of CHANGES- form on Page VI of this book. All Coast Pilot changes published in the U.S. Coast Guard Local Notice to Mariners, National Geospatial-Intelligence Agency Notice to mariners, and on the Internet at: http://nauticalcharts.noaa.gov/nsd/cpdownload.htm. are serially numbered (i.e., Changes No. 1, Changes No. 2. etc.) to assist you in tracking the changes.

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

FLORIDA- TAMPA BAY ENTRANCE- TAMPA BAY: Marine Advisory.

In order to minimize the risk of collision with deep draft vessels and improve the safe transit of shallow draft vessels within the Tampa Bay and its approaches, the Coast Guard Captain of Port Tampa, Florida issues the following advisory: A NOAA survey number H-11344 conducted in July, 2004 reported that a water depth of 10 feet extends approximately 500 feet outward from both sides of the main ship channel in the waters west of the Sunshine Skyway Bridge adjacent to Egmont Channel, Mullet Key Channel, and Tampa Bay Cut "A" except in the vicinity of the Sunshine Skyway Bridge where existing security zones prohibit navigation closer than 100 feet around all bridge supports, dolphins, and rocky outcroppings from piers 88 to 135. Continuing east of the Sunshine Skyway Bridge, the advisory includes the waters adjacent to Point Pinellas Channel, Tampa Bay Cuts -A-, "B", "C", "D", "E", "F", "G", "J-2", West of "K" Cut, Gadsen Point Cut, and Hillsborough Bay Cuts "A", and "C". All vessels drafting less than 10 feet may consider utilizing waters that have been identified by the 2004 NOAA survey parallel to, and within 500 feet of, the main ship channel when identifying the safest navigational course for transiting Tampa Bay and its approaches.

FLORIDA - INTRACOASTAL WATERWAY - CHARLOTTE HARBOR TO TAMPA BAY: Hazard to Navigation. (Updated)

The Coast Guard has received a report of a possible submerged object in the vicinity of the center span of the Ringling Bridge.

FLORIDA - INTRACOASTAL WATERWAY - CHARLOTTE HARBOR TO TAMPA BAY: Hazard to Navigation. (Updated)

On February 10, 2006 three (3) temporary buoys were deployed south of the new Ringling Causeway Bridge, in Sarasota Bay to mark submerged rocks that could pose a hazard to navigation during high tides. All three (3) buoys are east of the Gulf Intracoastal Waterway outside of the marked channel. The buoys are a standard, white, cylindrical information buoy. The buoys are anchored in place either on or in close proximity to the submerged rocks.

The buoys are one (1) foot in diameter and approximately 5 ½ feet tall, marked with a orange diamond shape and worded HAZARD. The approximate positions of the buoys are:

- 1. 27-19-52.620N 082-33-24.060W

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States. South Florida is extremely vulnerable because it is the terminus of illegal alien and narcotics smuggling routes from the Bahamas, the Caribbean and South America. These routes are well established and are readily available for use by terrorist organizations. An urgent need existed to make the American Public equal partners in the fight on terrorism. Operation "ON GUARD" creates an effective deterrent measure that employs the eyes and ears of the marine industry and the boating public, people that know every inch of the coastline because it is where they work and play. Potential terrorists are put on notice that their activities will be seen and reported.

Operation "ON GUARD" takes a two pronged approach consisting of face to face visits by Coast Guard, FBI, USCS, INS and FDLE personnel combined with a coordinated joint agency media campaign to reach Marina Operators, Marine Dealers, Bridge Tenders, Commercial Fishermen, and the Boating Public. This operation relies on Coast Guard Auxiliary programs already in place like the "Clean Marina" program, Vessel Safety Checks, Marine Dealer Visits and the Commercial Fishing Vessel Safety Program to reach their normal customers, the waterfront users. The public is provided with the toll free number (1.800.424.8802) for reporting suspected terrorist activity to the National Response Center and the 1.800.BE ALERT number for US Customs along with a list of reporting criteria.

Report:

- Suspicious persons conducting unusual activities
- Individuals establishing businesses or roadside food stands in proximity to marina or bridge
- Unknown persons photographing or creating diagrams
- Unknown or suspicious persons loitering for extended periods of time
- Unknown or suspicious persons renting watercraft
- Suspicious venders attempting to sell/deliver merchandise or drop off packages

FLORIDA – OKEECHOBEE WATERWAY – CALOOSAHATCHEE RIVER – SAN CARLOS BAY - SANIBEL CAUSEWAY BRIDGE: Bridge Construction.

Work continues on the Sanibel Causeway Bridge across the Caloosahatchee River, Sanibel, Lee County, Florida. Due to this bridge construction the vertical clearance has been reduced to 68 feet.

The Coast Guard Captain of the Port Tampa advises mariners that construction operations are being conducted on the Sanibel Island Bridge Span "A" until Monday, August 2, 2007, from 7:00 a.m. through 6:00 p.m. every weekday. The nature of the construction will cause several construction barges to block the channel in the vicinity of Span "A". The channel will be restricted to marine traffic by approximately 40 feet during the hours of 7:00 a.m. through 6:00 p.m., estimated. All mariners may contact the construction barge for information on VHF-FM channel 13.

The contractor has advised the Coast Guard that they intend to blast the old bridge remains between July 30 and August 10, 2007. The exact dates will be broadcast and published in future Local Notice to Mariners.

FLORIDA – GULF INTRACOASTAL WATERWAY – TAMPA BAY – BOCA CIEGA BAY – WELCH CAUSEWAY/TOM STUART BRIDGE: Bridge Repairs.

The Welch Causeway/Tom Stuart/SR 666 Drawbridge will be on single-leaf operations from June 25 to November 31, 2007. A double-leaf opening will be available with a three hour notice to the bridge tender. During these repairs the vertical clearance of this bridge will be reduced by five feet.

FLORIDA – GULF INTRACOASTAL WATERWAY – TAMPA BAY TO ANCLOTE KEY – BELLEAIR BEACH BRIDGE: Notice of Proposed Rulemaking.

Chart: 11411

The Coast Guard proposed to temporarily change the drawbridge regulation of the Belleair Beach Bridge, Gulf Intracoastal Waterway mile 131.8, Belleair Beach, Pinellas County, Florida. This proposed rule will require this drawbridge to open on signal, except that from 7 a.m. to 7 p.m. this bridge will open on the hour and half-hour. This action is necessary for workers safety and will assist in expediting the construction of the new bridge.

Comments and related material must reach the Coast Guard on or before August 2, 2007. Federal Register Notice *

As part of this review, the CRCP is looking for input from stakeholders and partners via a Federal Register Notice (http://www.coralreef.noaa.gov/Library/Publications/review frn.pdf)//

<http://www.coralreef.noaa.gov/Library/Publications/review_frn.pdf>. An independent contractor will summarize all comments received in response to this request and will provide them to the review panel.

The CRCP is most interested in obtaining feedback based on the public?s interaction and experience with the Program. Background information concerning the CRCP and its activities is available on the CRCP's website (http://www.coralreef.noaa.gov/review.html) <http://www.coralreef.noaa.gov/review.html>.

The CRCP is seeking input on the following questions. Please note that you do not need to address all questions, and the CRCP welcomes additional input on topics not covered in the questions listed. Because of volume of comments anticipated, the CRCP will not be able to individually respond to those providing comments.

- * Is the Program focusing efforts on the right suite of activities to advance coral reef conservation?
- * Are the Program's efforts in various geographic areas appropriate to address the issues in each region?
- * Are the Program's science and observation efforts (e.g., research, mapping, and monitoring) adequately addressing management needs, and informing and resulting in management actions?
- * Have the Program's education and outreach efforts been effective in reaching the proper audiences?
- * Is the Program providing effective leadership and building useful partnerships to advance coral reef conservation?
- * How can the CRCP improve its impact and performance in the future?

*Your comments must be submitted no later than July 19, 2007. You may submit comments electronically via email to **crcp.comments@noaa.gov* <mailto:crcp.comments@noaa.gov>*. You may also submit comments in writing to: *

During periods of channel closure, recreational vessels wishing to travel through this section of the Matanzas River may make a request to the Bridge of Lions bridge tender on VHF-FM channel 9, two hours in advance of intended transit. If operationally feasible, arrangements will be made for safe passage; however, due to the complexity of maintaining relative position on multiple construction barges with heavy equipment, channel openings should not be expected. Commercial marine interests should contact URS Construction Services, Public Information Officer, Ms. Laurie Sanderson at (904) 669-1165 prior to channel closure dates to inform of commercial operations and discuss options for accommodation.

Questions concerning this notice may be directed to U.S. Coast Guard. Sector Jacksonville, Chief. Waterways Management Division, LT Austin Ives (904) 564-7563.
